DETAILED ACTION

The Amendment filed January 11, 2006 has been entered.

Claims 1-63 are cancelled.

Claims 64 and 69 are currently amended.

Claims 64-70 are pending and are examined.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

All previous objections and rejections not set forth below have been withdrawn.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 64, and claims 65-70 dependent thereon, are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. This is a new matter rejection. Claim 64 as amended is drawn to an isolated gamma coixin promoter wherein the promoter comprises the nucleic acid sequence of SEQ ID NO:8 or a fragment comprising at least about 80 nucleotides thereof having promoter activity. An isolated gamma coixin promoter wherein the promoter comprises a fragment comprising at least about 80 nucleotides of the nucleic acid sequence of SEQ ID NO:

Art Unit: 1638

having promoter activity does not find support in the specification as filed and thus constitutes new matter.

Applicants' response filed January 11, 2006 indicates at page 4 that support for the amendment to claim 64 can be found at least, in the paragraph beginning at page 9, line 10.

The Examiner notes that while the paragraph beginning at page 9, line 10 refers to isolated gamma coixin promoters comprising from about 80 to about 894 contiguous nucleotides of SEQ ID NO:8, from about 222 to about 894 contiguous nucleotides of SEQ ID NO:8, and from about 412 to about 894 contiguous nucleotides of the nucleic acid sequence of SEQ ID NO:8, the paragraph beginning at page 9, line 10 does not refer to any isolated gamma coixin promoter comprising at least about 80 nucleotides of the nucleic acid sequence of SEQ ID NO: having promoter activity.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 64, and claims 65-70 dependent thereon, are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 64 is indefinite in the recitation of "at least about 80 nucleotides thereof having promoter activity". It is unclear how many nucleotides constitute "at least about 80 nucleotides thereof having promoter activity", as this quantity would vary depending on the nature of the promoter sequence limited, and is not defined in the specification with respect to the promoter sequence of SEQ ID NO:8.

Double Patenting

Claims 64-70 remain rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-15 of U.S. Patent No. 6,635,806, for the reasons of record set forth in the office action mailed October 12, 2005.

Applicants' response filed January 11, 2006 indicates at page 6 that a Terminal Disclaimer over this patent will be submitted upon an indication that the claims are otherwise allowable.

The rejection is maintained until the submission and approval of said Terminal Disclaimer.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
